BRETFORD®

PowerSync Pro™ GEN. 2 SMART HUB

ZERO-TOUCH MOBILE DEVICE PROVISIONING

Charge, provision, and manage a shared pool of iOS, or iPadOS devices.

For organizations looking to manage a large pool of iPhone or iPad devices, the PowerSync Pro™ Smart Hub provides a best-in-class hardware experience for simplifying the management of these devices. When combined with Apple Provisioning Utility (APU), or GroundControl®, organizations can gain control of their devices by automating device provisioning, lowering support costs, and improving workflow efficiency.

ZERO-TOUCH I.T.

The partnership of the PowerSync Pro™ Smart Hub and the powerful provisioning software provide I.T. Departments the ability to simplify management of devices and save critical time.

SELF-CONTAINED PROVISIONING

Secure dedicated compartment under the hub for securing the Mac mini* (2018) to run Apple Configuration 2 software (AC2), Apple Provisioning Utility (APU), or GroundControl Launchpad.

GROWTH IN MIND

The PowerSync Pro™ Smart Hub is designed to grow with your organization. Daisy-chain and provision up to three hubs or 40 devices with one Mac mini.

BUILT TO LAST

Designed and built in the USA.

Available only on larger 10L and 20L models.

OPTIMIZED FOR iOS AND iPadOS DEVICES

FULL-TIME, FULL-RATE CHARGING
Our iPhone charging station reliably maintains a 2.4A charging rate, even while connected to a host Mac mini for syncing. It also offers a charging rate of up to 1.5A with a Windows host.

STATUS ON-DEMAND | LED lights located next to each device show charging status and let you know when the device is ready for use.

EASY CONNECTION | Larger L models include USB-C pass-through port for easy connection of other peripheral devices to the internal Mac mini.
