Using Your Product
CUBE Cart Max™

Setting the Combination Lock

Your new CUBE Cart comes equipped with a resettable Combination Padlock. You can program the lock with your own combination. The lock starts with 0-0-0-0. Follow the directions with the look for changing the combination. Remember to depress the shackle before disengaging it from the lock.

Wiring CUBE Cart Max™

Before you begin, ensure the unit is off and unplugged from the wall.

1. Use the key from the hardware pack to unlock and remove the back access panel

2. Rout the plug through the power adapter trays through the hole and plug into the e-unit. Excess cords on the bottom row can be managed underneath the tray to not interfere with the back panel

Using Your Product
CUBE Cart Max™

3. Rout the connector end of charger through the opening towards the front of the cart.

4. Move to the front of the cart and open the doors. Measuring the perfect length: With the device connector end, measure the length to reach the device charging port. Then secure the cable into the CableBoss™ cable management feature above each slot.

5. Repeat above process for all 30 adapters.

6. Replace the back access panel and lock using the key.

7. Connect the main CUBE Cart Max™ power cable into the wall.

CUBE Cart Max™

Power Manager

When the cart is turned on, the timer begins rotating power to 6 outlets every 10 minutes. This allows efficient charging of the devices in the cart from one standard wall outlet

Important Information
Safety Notice

- Product for indoor use only

- Ensure the power switch is in the OFF position and CUBE Cart Max™ is disconnected from the wall outlet before plugging devices into e-unit.

- Do not plug the unit in if the switch or power cord has been damaged.

- Unplug unit from the wall before moving to a different location.

- The socket-outlet shall be installed near the equipment and shall be easily accessible.

- For safety purposes, make sure all electrical components do not exceed the maximum load rating of 12 amps.
