

Managing Devices in Retail

Mobile devices continue to be critical tools by helping retail organizations simplify the customer check out process, facilitate curbside pickup, and streamline back-of-house inventory.

The Problem

Organizations rely on mobile devices for POS and back-of-house processes, leading to challenges over device readiness, device security, and remote device management.

Device Readiness

With limited devices ready to use, organizations struggle to fulfill orders, make sales and be productive.

Remote Device Management

Managing up to thousands of devices across multiple locations takes a strategy with ample planning and tools in place to succeed.

Device Security

Without a strategy to manage mobile devices, a hardware investment can be unprotected from loss or theft.

Our Solution

Bretford's line of charging and provisioning solutions are critical to retail mobile device deployment strategies.

CUBE® Line
